

I am very concerned that Sinclair Broadcasting appears to be developing plans which would require their stations to air an extremely partisan piece against Senator John Kerry prior to the upcoming election. This is especially disturbing because the piece they would air is biased information which could conceivably help determine the outcome of this election. It is imperative that the FCC protect our country's free airwaves and not allow them to be used by any corporation in its attempt to sway public opinion in an election. Our Democracy is at stake.

Thank you. Patty Dykstra
